

AUXILOCK® PEEK CF PUSH-IN SUTURE ANCHOR

Shoulder Instability Repair

AUXILOCK® PEEK CF Push-In Suture Anchor is a Push-in/ Bang-on anchor available in diameter of 2.8 and 3.5mm. It is available in double loaded sutures with and without needle options. The PEEK CF Push-In Suture Anchors are made of carbon fiber-reinforced PEEK-OPTIMA. The PEEK CF provides modulus of elasticity closely matching the cortical bone. It is non-absorbable, radiolucent, and MRI safe. The drill guide and drill bit are provided in the instrument set for the accurate placement of the anchor which minimizes the anchor slippage or breakage during the surgery. Anchor insertion and delivery are made simple by drilling a hole through a drill guide and inserting the anchor through the same drill guide into the drilled hole. The anchor is also available with needles which are ideal for mini-open Bankart or SLAP repair procedures.
