SELF TAPPING
SCREW

TWIX TITANIUM SCREW-IN
SUTURE ANCHOR

TITANIUM SCREW-IN
KNOTTED SUTURE ANCHOR

The self-tapping AUXILOCK® Titanium screw-in suture anchor is mostly used as a medial row anchor in rotator cuff repair surgery. It is recommended for use in small and large-joint repairs without the need for tapping or drilling.

AUXILOCK® Titanium screw-in anchors are available in diameter of 5.0 and 6.5mm with double and triple loaded options. The anchor design incorporates a cancellous thread with a very small core diameter to maximize pull-out strength in cancellous or osteoporotic bone. The anchor is designed for ultimate mechanical properties (pull-out strength, tensile strength, etc) and ease-of-use. The self tap & self screw anchors are also available with needles which are ideal for mini-open rotator cuff repair procedures.
